Book Systems, Inc. releases Atrium 3.0

Book Systems, Inc. announced today the release of Atrium 3.0. Version 3.0 contains new features, as well as enhancements designed to expand the depth of this Web-based library automation system. Major features include:

- ❖ Additional OPAC Themes have been added to meet the needs of a variety of libraries and their patrons.
- ❖ Lexile Support is now available for OPAC searches and identifies items labeled with Lexile information.
- ❖ Customized Visual Search allows librarians to add and edit visual search categories, entries, and icons to suit the patrons' needs.
- ❖ Multiple Form Letters are now an option, saving valuable resources by combining multiple notices on one sheet of paper.
- ❖ Self Check Stations are available to licensed users and provide an easy-to-use self check screen for patron use. This feature is useful for patrons who need to quickly check items out when the library is busy, or for school libraries where an entire class checks out at the same time each week.

About Book Systems, Inc.:

Book Systems Inc. provides affordable feature-rich library software that delivers solutions to libraries of all sizes. Our software is suited to fit the needs of librarians in a technology driven world, while still being easy to learn and user-friendly. Atrium offers an easy-to-use circulation desk, quick cataloging, MARC editing, analysis, easy-to-create reports, theme choices, serials, acquisitions and textbook management. Our software provides more features and demands fewer resources. Book Systems is dedicated to quality and customer satisfaction, and has implemented library automation solutions in thousands of libraries around the world. The company's philosophy is very simple: create quality products; test them with input and direction from librarians in the field; and back them up with renowned customer service and support. Book Systems is a privately-owned company with its corporate headquarters located in Huntsville, Alabama, where NASA's space programs and

other government technologies have created a vibrant environment of innovation. Further information is available at www.booksys.com.
