Charlotte County School District in Virginia implements Booktracks for Assets

Booktracks has many great new features for tracking your assets – whether it is computers, eReaders, or desks. One report – the equipment summary report – allows the administrator to drill down from the total in the system, the specific school, the exact item, and the person who has it checked out. With the addition of large numbers of computers, Booktracks will aide staff in ensuring accountability of these expensive assets. The software has great context sensitive help files that are very useful for new users.

About Book Systems, Inc.:

Book Systems, Inc. cost-effective, feature-rich library and textbook and asset management software that delivers solutions to libraries and schools of all sizes. Booktracks, our Web-based textbook management solution, was designed to protect one of the district's most valuable assets - textbooks. Our software is suited to fit the needs of the textbook coordinator in a technology-driven world, while still being easy to learn and user-friendly. Booktracks offers easy-to-use Self Check Out and Self Check In Stations, quick cataloging, and standard and customizable reports. Book Systems is dedicated to quality and customer satisfaction. The company's philosophy is very simple: create quality products; test them with input and direction from textbook coordinators in the field; and back them up with renowned customer service and support. Further information is available at www.booksys.com and www.booktracks.net
