

Library Automation Made Easy . . .

Award-winning, affordable library automation software

Concourse is the most advanced library management system available today. Designed with the librarian's needs in mind, Concourse makes managing your library easy! Librarians everywhere agree that Concourse is rich in features and easy to use. Take a look and see how your library can be automated quickly and easily, saving time and money.

Looking for more proof? Concourse received the Media & Methods magazine's Awards Portfolio Winner 2004 for comprehensiveness, versatility, ease-of-use, and innovativeness.

Book Systems is celebrating more than 15 years of dedication in providing superior software plus exceptional customer service and support for over 6,000 customers worldwide. But don't take our word for it. See for yourself why Book Systems stands above the competition.

And more . . .

"Feature for feature, Concourse is a powerful tool that makes library automation both affordable and easy to use."

Judy Beatty
Library Director
Gentry County Library, MO

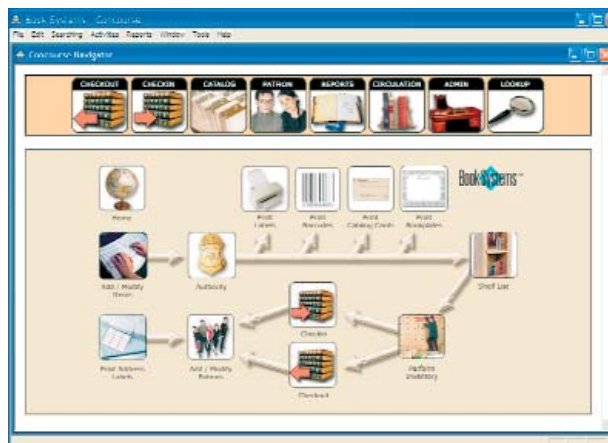

Quick Cataloging

Easy entry cataloging screens with autoMARC technology ensure that you can catalog your collection quickly. Increase speed and accuracy with our add-on authority module and eZcat software. eZcat and the Internet gives you access to millions of professionally cataloged MARC21 records direct from the Library of Congress, large public and academic libraries, and library consortiums. Use eZcat to search and drop pre-cataloged entries right into the Concourse cataloger screen. Copy cataloging has never been easier!

Easy Navigation

Concourse uses flowcharts and toolbars to provide easy and instant access to every library task. Based on input from our customers, we developed Concourse so that you can operate your library efficiently.

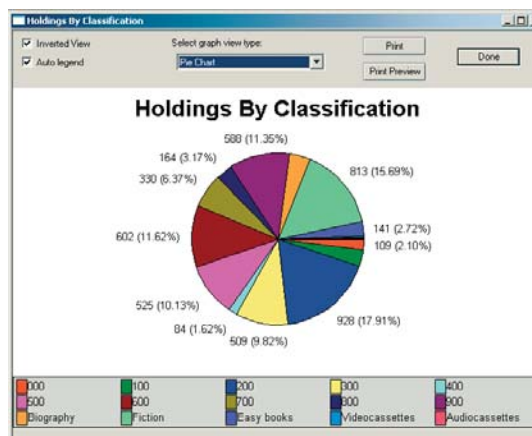

Secure Access and Control

Limit access to specific functions of Concourse by creating individual worker logins and assigning permissions. Use Concourse OPAC to provide patrons search-only access of your collection.

Customizable Reports

Easily transform standard library reports with powerful filters, global editing, drill-down capabilities, and more. Concourse provides versatility and built-in report graphing without having to export data to other programs.

System Requirements

- 128 MB RAM for Windows ME, NT, 2000, or XP
- Pentium II or greater
- 55 MB hard disk space available for program files and electronic guides
- Additional 2 MB hard disk space for each 1,000 bibliographic records
- SVGA Monitor 800 x 600 or greater and at least 16-bit color
