

## Putting the ease of self checkout in your patron's hand

Librista CheckIt is an app that allows patrons to borrow items from your library using their iOS or Android devices. The patron simply logs into their account and scans the barcode(s) of their selected item(s) with the mobile device's camera. Once items are checked out, based on your library's policies, the patron can leave the library without having to stop at a kiosk or the circulation desk. Implementing a self checkout app encourages patron participation and increases your library's circulation. Free up front-end support personnel while maintaining social distancing, limiting contact, and enriching your patrons' experience.

### Designed with today's library user in mind

**Efficient**  
Provides quick and contactless circulation

**Confidential**  
Private and Secure for Patrons

**Compatible**  
Uses the auto-focus camera on any iOS or Android device
