

Using Common Sense Categories

A NEW APPROACH TO LIBRARY ORGANIZATION

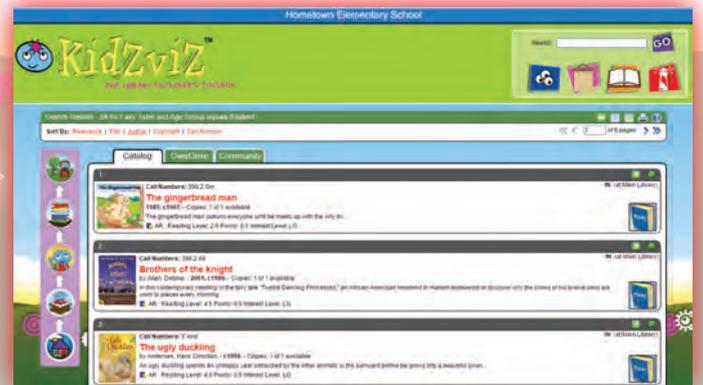

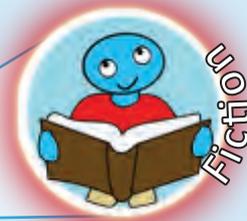

Click a bubble to find what you want

The KidZviZ OPAC interface for Atrium creates a world that kids can navigate through using reading skills over a wide range.

Unlike other visual navigation systems, KidZviZ is infinitely expandable - everything fits in a way kids can quickly grasp and return to again, and again, and again.

KIDZVIZ SEARCH NAVIGATION STRATEGY:

In addition to Dewey, KidZviZ now supports Common Sense Categories (CSC), a categorization system designed for elementary school districts. CSC provides a system for young students to be able to quickly and easily locate books by following the bookstore layout. It's much more natural for a student to ask for the Sports section, as opposed to the 796s that is used by the Dewey Decimal System.

For additional information regarding CSC, visit: <http://www.common sensecategories.com/>
