# Book Systems®

eZcat®

eZcat is a feisty cataloging tool - that really hits the MARC!

No more per-record fees. No more out-of-date CDs. No more online subscriptions.

Internet access allows eZcat to help you take advantage of Z39.50 technology by obtaining free MARC 21 records. Search multiple library databases simultaneously (Library of Congress and over 500 other publicly listed libraries) and retrieve cataloging data for all of your library materials (books, video, audio, computer files, etc).

Additional features of eZcat include:

• Download one or many records instantly!

• Search for MARC records in batch.

• Use with other library automation systems that import MARC 21 records.

• Add Study Program and/or local holding information before export.

eZcat Pro supports all the features of eZcat, plus powerful printing and editing features.

• **Import MARC record files** – Review MARC record files you receive from book vendors before you import them into your automation system.

• **Edit MARC records** - Create new fields, configure the leader, add or remove fields and sub-fields, accept or change sub-codes and tags, configure local holdings, apply templates, and more.

• **Print labels and cards** – Print barcodes, catalog cards, and spine and pocket labels, as well as Study Program labels (Accelerated Reader, Scholastic's Reading Counts!, etc.).

• **Batch operations** - Perform global edits and/or validation on your MARC 21 records.

Features	eZcat	eZcat PRO
MARC 21 compatibility Compatible with library automation systems that import USMARC / MARC21 records. Import instructions are in Help for popular software: Follett, Athena, Winnebago.	✓	✓
Free MARC records (all formats) Get *FREE* records: books, videos, sound recordings, computer files, maps, films, etc.	✓	✓
More than 500 libraries Connection list contains over 500 libraries. Select from them or add other sites.	✓	✓
Search connections simultaneously Search all your connections at once, or you can search an individual connection.	✓	✓
Batch export multiple records from a search Highlight and export multiple records from the results of your search.	✓	✓
Add local holding before export Add local holding information before you export, i.e., call number, item barcode, and cost.	✓	✓
Electronic transcription Electronic transfer of professionally prepared MARC records instantly; quick and easy! Download directly into Concourse or Atriuum; import file into other MARC based automation system.	✓	✓
Show only the types of MARC records you want Displays only the type records you want to see in your search results; for instance, you may restrict a search to videos and sound recordings. Choose any or all of 9 material types.	✓	✓
