In today's world, patrons have become familiar with the various self-service options offered by retail and national chain stores. Many patrons prefer the flexibility and convenience these services offer. As librarians, there is a never-ending task of figuring out ways to improve the efficiencies and workflows within the library, thus giving more time to better serve your patrons.

Express CheckIt is an integrated module for Atrium providing your library an economical self-check solution and adds a convenience for your patrons.

**Improves Your Circulation Workflows**

The intuitive interface allows your patrons to checkout items quickly while maintaining their confidentiality and frees up staff members time.

- Easy to Implement
- Intuitive User Interface
- Improve Your Circulation Workflows
- Private and Secure for Your Patrons

You can easily turn any Web enabled computer into a self-check station simply by adding a barcode reader and/or touch screen monitor.

**Need More Information?**
Contact your Book Systems’ sales representative for additional information.

A variety of optional hardware and configurations are shown on the back.
The touchscreen (15” viewable) monitor is ideal for Express CheckIt. The sensitive touch response screen recognizes precise location and amount of pressure applied with a finger.

- 1024 x 768 Resolution for sharp brilliant images of text and graphics
- Image brightness 230 cd/m² and 500:1 contrast ratio
- 16 ms typical response time enable crisp and clear images
- Viewing angles of 125 vertical and 140 horizontal degrees

Finger readers improve speed and accuracy of your library circulation. Patrons quickly become accustomed to automatically identifying themselves. Protects the identification of your patrons and does not store the fingerprint image.

- Operates with Windows XP or greater
- Requires USB connection

Stationary Linear Imager w/hands-free stand and USB connection. Quickly reads even damaged and poorly printed barcodes.

- Trigger, Flash or Continuous modes supported
- 270 scans per second
- Working range from 0.5 to 18 inches from barcodes
- Drop resistance to approximately 5 foot

Book Systems offers a complete turn-key self-check out/in solution (pictured left). The Express CheckIt module requires a license to be activated.
