Books Systems, Inc. Announces New Website Redesigned to better serve our customers

We are proud to announce the release of our all new Website. It has been vastly improved to better serve our customers, reflect who we are as a company, and increase awareness regarding the products and services we offer.

Immediately noticeable is that our focus is about our customers. We trust that the streamlined menus, simple navigation, "live chat" feature, and customer login area provide quick access to information when you need it.

By providing an improved destination for our customers and prospects, we have designed the new Book Systems Website as a resource hub with expanded capabilities for educating, sharing, and interaction.

New pages will include:

- *Homepage* – at a glance, see product announcements, what's new, customer success stories, upcoming events, customer login, live chat, and easy navigation to access the information you want.
- *Success Stories* – watch and listen to our customer success stories and testimonials.
- *New & Events* – see what's happening at Book Systems, view press releases, conference schedules, events, and more.
- *Customer Login* – active customers can login and gain access to additional resources not available to the general public. View tutorials, join our customer Listserv, and see when product updates are available.

-- more --

We will continually expand our Website and encourage visitors to bookmark it, check back often, and connect with us on [Facebook](#) and [Twitter](#) to receive updates.

Thank you to all of our customers for your loyalty, support, suggestions, and feedback for improving our products and services.

For us, it really is “all about you!”

About Book Systems, Inc.:

Book Systems provides state of the art library automation and asset management software to libraries and schools of all sizes. The company's core values have led them to develop and deliver stress-free “cloud computing” technology, customer-driven features, and hands down, the best support in the industry. Book Systems is a privately-owned company with its corporate headquarters located in Huntsville, Alabama.
